Harley 88b Engine Problems

It is a really serious engine problem that needs a lot of attention to get fixed. The scariest part here is that it can fail at 15,000 miles and even the new hydraulic system can fail at 40,000 miles or less. The plastic shoes need replacing every 40,000 miles because of its weak durability. Another scary part here is that even the new engines still have the probability of having the same problem with the older engines.

88 Twin Cam Engine Problems

Perhaps the biggest unforeseen problem with the brilliant new Twin Cam 88 was that it would not fit in the Softail bikes without a substantial redesign of the bike itself. The Softail frame was a tighter fit and did not provide room to rubber mount the motor like the Dyna and touring models do, which was considered a necessity due to the larger pistons and increased vibration.

Harley-Davidson Twin Cam Powered Bikes History 1999-2012 ...

Those that got their bikes to the dealer or any Harley dealer had to leave the bike, then the dealer sent the engine back to Harley Davidson, it was replaced with a new engine. All latter 1999 Fatheads and all 2000 Fatheads no longer have any problems that are known of at Harley Davidson or their dealers at this point in time.
