That's not all as you can read a lot of related articles on the website as well.

### Mercury Mariner Outboard 45 Jet

Mercury® jet-drive outboards are specifically designed to pilot boats in shallow waters where propeller-driven hulls are unable to operate. Because there's no lower unit extending below the hull, the jet drive permits passage over obstacles that would restrict access to a propeller-driven outboard boat.

Re: 45 hp Mercury Jet Issues Anything is possible, but I haven't seen a rev limiter (the one for max RPMs) cause this problem (I'm sure it has though). Some motors have a slow mode, if the motor gets too hot, or is not getting enough oil, it can limit the RPMs to help prevent damage, I'm not sure if this motor has this feature or not.

Carb kits or carburetor rebuild kits are among the most frequently purchased outboard maintenance parts. New gaskets, O-rings, and fuel inlet needles and seats are often required to return a poorly performing motor to good working order. Some carb kits contain floats and some don't. The main carb jets are not in all kits, either, so it's a good idea to look at a complete engine diagram to see ...
